Professional Summary

Results-driven Flutter Developer with 3+ years of experience in building scalable, high-performance mobile applications. Strong expertise in Clean Architecture, SOLID principles, and delivering secure, production-ready solutions with a focus on performance, maintainability, and real-time capabilities.

Technical Skills

Languages: Dart
Frameworks: Flutter
Architecture: Clean Architecture, MVVM, SOLID Principles, Repository Pattern
State Management: Riverpod, Provider, GetX
Backend & APIs: REST APIs, Firebase, JSON
Databases: Isar, SQLite, Hive
Mobile Integrations: Method Channels, Native Android/iOS, Biometric Auth, Camera, QR Systems
Tools: Git, CI/CD, Play Store & App Store Deployment

Professional Experience

Flutter Developer — Kanishka Software Pvt. Ltd. Sep 2023 – Present

- Architected and developed scalable Flutter applications using Clean Architecture, improving maintainability and code reusability.
- Implemented biometric authentication and liveness detection, enhancing security and preventing spoofing attacks.
- Built real-time streaming features and optimized app performance, reducing latency and improving user experience.
- Integrated native Android and iOS functionalities using Method Channels for advanced platform-specific features.
- Managed end-to-end deployment on Play Store and App Store, including certificates, provisioning profiles, and release cycles.

Flutter Developer — Maqja Consultancy Services Jun 2022 – Feb 2023

- Developed cross-platform mobile applications using Flutter, ensuring consistent performance across devices.
- Integrated third-party APIs and improved response handling for better app efficiency.
- Collaborated with backend teams to design scalable API integrations and data flow.

Key Projects

Attendance Management System

- Developed a secure attendance system using fingerprint and facial recognition with liveness detection.
- Improved authentication accuracy and reduced fraudulent check-ins.
- Implemented role-based notification handling for leave and regularisation workflows using FCM and local notifications, ensuring accurate navigation and seamless user experience across different user roles.

HealthyU

- Built health and wellness application integrated with Firebase and real-time APIs.
- Enhanced user engagement through optimized UI and data handling.
- Integrated **MoEngage** for cross-channel user engagement, including push notifications and in-app campaigns across both Android and iOS platforms.

KoMark

- Developed marketing campaign management platform with analytics and media handling features.

Education

Bachelor of Computer Application 2018 – 2021
Chandrabhan Sharma College of Arts, Commerce and Science, Powai Vihar, Mumbai
