PROFESSIONAL SUMMARY

Senior Flutter Developer with 3+ years of experience building scalable, high-performance mobile applications. Strong expertise in Flutter architecture, native Android & iOS integrations, real-time features, and end-to-end app deployment on Play Store and App Store. Proven ability to collaborate cross-functionally and deliver production-ready applications.

CORE SKILLS

Flutter, Dart, Clean Architecture, SOLID Principles, REST APIs, Firebase, Provider, Riverpod, GetX, Git,

Flutter Method Channels (Flutter Native), Native Android & iOS Development, iOS-specific bug fixes & optimizations

Real-time audio streaming & listening, Camera & Biometric integrations, Performance optimization

Play Store & App Store deployment, App signing, Versioning, Release management

PROFESSIONAL EXPERIENCE

Flutter Developer – Kanishka Software Pvt. Ltd. (Sep 2023 – Present)

- Designed and developed scalable Flutter applications following clean architecture and best practices.
- Implemented advanced state management (Provider, Riverpod) to improve performance and maintainability.
- Built hybrid solutions using Flutter Method Channels to integrate native Android and iOS functionalities.
- Implemented real-time camera, biometric authentication, liveness detection, and audio streaming features.
- Led Play Store and App Store deployments, handling builds, certificates, provisioning, and release cycles.
- Collaborated with product managers, designers, backend engineers, and QA teams in agile environments.

Flutter Developer – Maqja Consultancy Services (Jun 2022 – Feb 2023)

- Developed and maintained Flutter applications for multiple clients across domains.
- Integrated third-party SDKs and REST APIs for data-driven features.

- Optimized application performance by refactoring code and resolving memory leaks.

KEY PROJECTS

Attendance Management System (Flutter, Native iOS/Android, Biometrics)

- Developed a secure attendance platform using fingerprint and face-based verification.
- Implemented real-person (liveness) detection to prevent spoofing attacks.
- Reduced proxy attendance and automated manual verification processes.

HealthyU (Flutter, Firebase, Riverpod)

- Health and wellness application with authentication, fitness tracking, and personalized recommendations.
- Integrated real-time APIs, notifications, and Google Maps features.

KoMark (Flutter, Firebase, GetX)

- Marketing campaign management app with analytics, media upload, and video playback.

Visitor Management System (Flutter, QR Code, Printing)

- Visitor check-in/out system with QR code generation, photo capture, and printing support.

EDUCATION

Bachelor of Computer Application – Mumbai (2018 – 2021)

CERTIFICATIONS

Flutter App Development – Udemy (2022)

LANGUAGES

English, Hindi, Urdu
